SLIIT FACULTY OF COMPUTING - RESEARCH PROJECT CHARTER

[SAMPLE DELIVERABLE - SUBJECT TO OFFICIAL COORDINATOR SIGN-OFF]

Project Title: AI-Powered Intelligent Talent Acquisition System

Project ID: R26-IT-082 | Academic Year: 2025/2026

Supervisors: Mr. Dhammika De Silva, Mr. Samantha Rajapaksha

1. PROJECT PURPOSE & GOALS

The primary purpose of this research project is to develop an integrated multimodal artificial intelligence framework that addresses acute inefficiencies in high-volume technical recruitment and employee turnover forecasting.

2. RESEARCH TEAM MEMBERS & ALLOCATIONS

- Fonseka W.G.K. (IT22248794): Hiring Risk & Early Attrition Prediction Module
- Jayantha C.H. (IT22226914): Intelligent Resume Parsing & Skill Proficiency Analysis
- Deshan M.A.K. (IT22195616): Job-Candidate Matching & Explainable AI Engine
- Tennakoon T.M.S.S. (IT22197832): AI-Based Interview Evaluation & Certification Validation

3. GOVERNANCE & ETHICAL SAFEGUARDS

- Exclude protected demographic attributes (Age, Gender, Marital Status) from predictive inference.
- Provide explainable decision support (TreeSHAP) without autonomous hiring determination.
- Comply with SLIIT Code of Academic Integrity and Data Protection Guidelines.

NOTICE: This document is a structured placeholder representing the preliminary project charter.
The final signed group charter is maintained under institutional submission archives.
